About us

Kannaway is a hemp lifestyle company aiming to make the world a better place by making safe, reliable, quality and beneficial cannabis products accessible for everyone and by changing minds and laws by helping people learn more about cannabis, hemp and CBD.

Our mission is to share the science, products and message of beneficial cannabis as The World's Premier Cannabis Company™. We use mother nature's gift to help provide every day solutions for everyday people around the world via thousands of our Brand Ambassadors.

We inspect each batch of our hemp oil at three different points in the cultivation process of our products through our stringent Triple Lab Tested™ standard. Kannaway has been granted the US Hemp Authority Certification in recognition of the quality and safety measures put in place to ensure the integrity of our products with our Soil to Sale® promise.

Kannaway has been featured in numerous publications such as; Forbes, Fortune Magazine, Huffington Post, Wall Street Journal, NBC, Fox News, CNBC, The Chicago Tribune and the show "the Doctors" on CBS.

Farming & Heritage

Creating an industry

We researched over 3,000 different cultivators and different cultivars to find the right partner whose farm could provide the ideal hemp to create the products we intended.

Unique Processes

The first of its kind

Our world-renowned scientific team, led by Dr. Stuart Titus, have over 40 years of expert experience in the biotech field and work closely with our certified partners to ensure our extraction process is followed meticulously from Soil to Sale®.

Triple Lab Tested™

Creating the standards

Being the first at something means you have to go above and beyond, and the quality assurance that begins in our fields is then certified in our science labs. Safety is our top priority, and that's why in 2012 when standardised testing procedures for cannabinoid products didn't exist - we went out and created them.
